Institutional Distinctiveness

Established by the then MP Govt. in 1983 with the aim of empowering women through higher education at the eastern border of the state of Chhattisgarh, our college is dedicated to providing quality education to the female folk of the area. This is the only girls' college in the district located in the heart of the city which attracts aspirants from urban as well as rural areas, who are socially and economically very backward. The college has a campus area of 7.5 acres in the center of the city and is located just at a walkable distance from the main bus stand and Raigarh Railway station. Apart from its main building which encompasses a library, office, classrooms, and labs, from this session, our newly constructed well-furnished General Girls Hostel is now ready to accommodate students who join our institution from faraway places of rural areas. The institution has its own canteen and cycle stand attached to the boundary wall of the campus. For security purposes, the campus is under the surveillance of high-quality CCTV cameras. We are waiting for the completion of our incomplete building so that new PG programmes might be introduced. After the bifurcation of the state in 2000, the institution was named after **Pt. Kishori Mohan Tripathi**, the son of the soil, Litterateur, freedom fighter, and a member of the Constituent Assembly.

Starting with the limited number of students, the college now is a center of learning for more than a thousand girls aspiring for a better life and career when they pass out from here. Keeping in mind the further progression of the students, the PG Courses were also started in Hindi and Commerce respectively. In order to claim stakes in the job market, the PGDCA programme was introduced in the college in 2016-17 under the self-finance scheme at the lowest fee in the district. Most of the rural students come from a poor economic background and distinctively they have been given the privilege to pay their fees in two installments. The institution makes consistent efforts in fulfilling its social responsibility toward the downtrodden and marginalized section of society. We also make our students imbibe healthy human values and ethics to enrich their personalities in order to transform them into good citizens of the country. The institution not only equips students with knowledge of the various subjects taught but also takes care of the personality development of the students. The well-furnished playground, basketball court, table tennis, and badminton court, provide ample opportunity for students to grow in the field of sports. Even in the wake of the pandemic Covid-19, every step was taken by the institution not only for their safety but also for their continuous study in an online mode. The institution took it as a challenge and converted the crisis of Covid-19 into an opportunity. The teachers, who were not very skilled in the use of ICT, were trained and they continuously took classes through Google Meet, Webex, ZOOM, etc. The teachers were continuously in contact with the students giving them moral and psychological support during the pandemic to keep their morale high.

Gradually the institution is moving towards digitalization and trying for transparency in all aspects. Scholarships are remitted directly to the students' accounts. Similarly, we are trying to become cashless in all terms of transactions from next year. Maximum transparency is observed during the online admission process. The institution is also equipping itself to welcome the new education policy with all its preparedness from this session which has a considerable focus on digital education on various platforms and the transfer of credits. It is our aim to optimize the just of ICT in teaching-learning and office management. We have yet to upgrade untraditional classrooms to smart classrooms with all the necessary ICT tools. Being the only girls college, the institution shoulders the responsibility of serving society with the diverse socio-economic rift. The dedicated faculties guide students for the university as well as competitive examinations. That's why they have been able to qualify for various competitive exams like Assistant professors, teachers, lecturers, judiciary, and other state-level

competitive exams. Many students from our institution have been able to get positions in the university merit lists at UG and PG levels.

NSS and Red Cross Society units of the college not simply engage the students in various extension and welfare activities but also arranges camps for medical health check-ups, blood donation, skin care, first aid, hygiene and sanitation drives etc with the help of local experts. One of our best practices is directed towards creating awareness about sanitary pads, lack of knowledge and myths surrounding womens' menstrual problems which lead to the dropout of appx. Five crore girls from school every year. The institution caters to the holistic development of the students through Yoga and moral and spiritual preaching by members of Gayatri Shaktipeeth and Brahma Kumari. Physical facilities like rich library, incampus playground, basketball-cum rollball court, multi-station gym, cycle stand, girls hostel, canteen, and heavy-duty power backup system also add to the distinctiveness of our institution.
